

Shaik Mohammad Sajjad

+91-808-803-2825 | sajjad102005@gmail.com | github.com/SajjadShaik2005 | linkedin.com/in/shaiksajjad

Professional Summary

AI & ML-focused Computer Science Engineering student with hands-on experience building machine learning, NLP, and RAG applications using Python and SQL. Skilled in Scikit-learn, FastAPI, Streamlit, and model evaluation, with experience deploying practical AI solutions.

Education

Vellore Institute of Technology (VIT), Bhopal 2023 – 2027
Bachelor of Technology in Computer Science Engineering (AI & ML) CGPA: 8.11

Technical Skills

- **Programming Languages:** Python, SQL
- **AI/ML:** Machine Learning, Natural Language Processing, Retrieval-Augmented Generation, Semantic Search, Scikit-learn, SHAP
- **Libraries & Frameworks:** LangChain, Sentence Transformers, Streamlit, PyMuPDF, ChromaDB
- **AI-Assisted Development Tools:** Claude, Antigravity, Codex
- **Databases:** MySQL
- **Core Concepts:** Object-Oriented Programming, DBMS

Projects

ChurnLens 2026

Python, Scikit-learn, SHAP, Streamlit – Live Demo: tinyurl.com/3tfa2ptf

- Built a machine learning application that predicts telecom customer churn probability and identifies important customer risk factors.
- Performed preprocessing, feature engineering, and model comparison using Logistic Regression, Random Forest, and HistGradientBoosting.
- Developed a Streamlit dashboard with real-time predictions and SHAP-based model explainability.

DocuMind AI 2026

Python, Streamlit, RAG, ChromaDB, Sentence Transformers – GitHub: tinyurl.com/m5vpw4w3

- Built a Retrieval-Augmented Generation (RAG) application that allows users to upload PDFs and ask natural-language questions about their documents.
- Implemented PDF text extraction, semantic search, document chunking, and vector retrieval using PyMuPDF, Sentence Transformers, ChromaDB, and LangChain.
- Added source and page-level citations with LLM integration to provide context-aware and verifiable answers.

AI Resume Matcher 2026

Python, FastAPI, NLP, TF-IDF, Render – Live Demo: tinyurl.com/3n4e4pvx

- Built and deployed a web application that evaluates PDF/TXT resumes against job descriptions and ranks candidates by overall match score.
- Implemented resume text extraction, TF-IDF-based similarity scoring, technical keyword matching, skill-gap analysis, and personalized course recommendations.
- Developed REST APIs with FastAPI and deployed the containerized application on Render for browser-based access from any device.

Certifications

Applied Machine Learning in Python – University of Michigan (Coursera) 2025

Covered supervised and unsupervised learning, model evaluation, and feature engineering using Python and scikit-learn.

AWS Technical Essentials – AWS Training & Certification 2025

Completed foundational training on core AWS services, cloud infrastructure, and deployment models.

AI/ML Internship Program – MP Online 2026

12-week structured, hands-on AI/ML internship covering the end-to-end ML workflow – data preprocessing, model building, and evaluation – through real-time live project work.
